# How to create a new Smarthome Skill for SmartHomeNG

#### **Create new Skill**

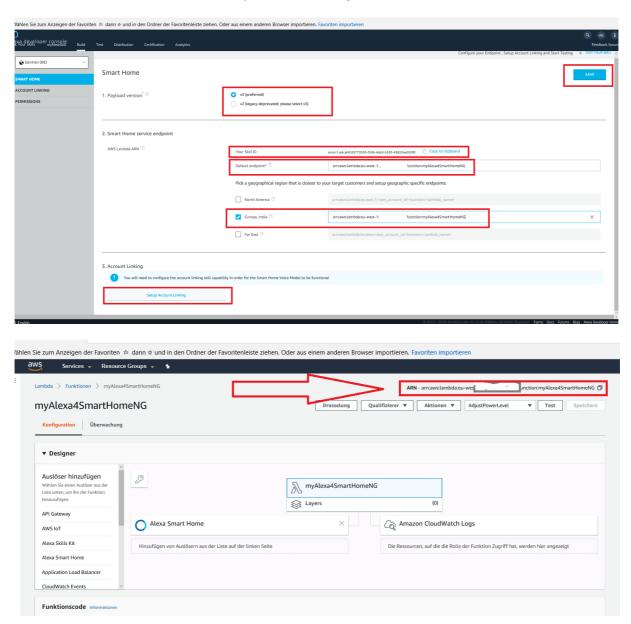

# Give a Name for example "myNewSkill", select Smart-Home model

#### **Create Skill**

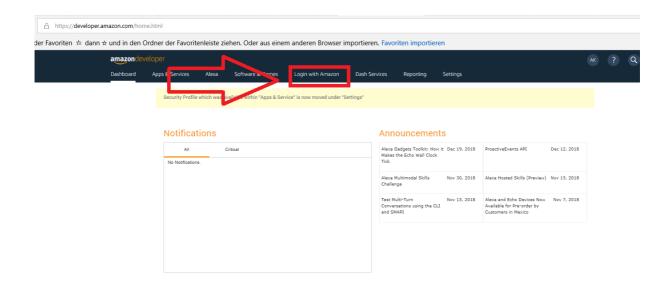

- Select the Payload-Version
- Enter the default-endpoint (got from the aws-Lambda in the top/right corner)
  put in the default-endpoint and to Europe/India
- Copy the Skill-ID to Clipboard and insert it into a Editor Document (you need it in the Lambda)

Press "Save" then Press "Setup Account-Linking)

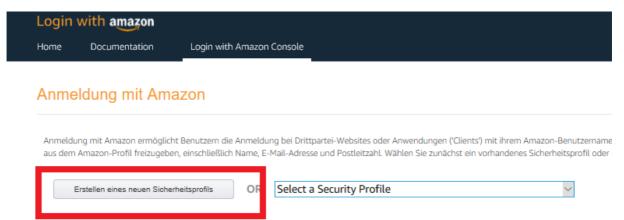

All the informations you need you get by creating LWA on <a href="https://developer.amazon.com/home.html">https://developer.amazon.com/home.html</a>

(Login in with Amazon)

# **Setup new Security profile**

Login mit Amazon-Konfigurationen

# **Settings:**

- See Screen Shot, Setting for the Privacy Policy have to be entered and must be a reachable URL but it's not neccesary to make sense.
